

Scalextric Goes British Touring Cars

Colin Turkington will be in the homes of many in the coming months as Scalextric has produced a model of his 2015 British Touring Car Championship VW CC. Joining the Turkington VW will be models of the Andrew Jordan MG, the Matt Neal Honda Civic and the Rob Collard BMW.

In addition there will be a BTCC Champions set featuring Turkington's WSR BMW and Gord Shedden's Honda Civic.

This will not be the first time that one of Turkington's cars has been featured by Scalextric, the first was back in 2004.

“As a kid who grew up slightly addicted

to playing Scalextric it feels pretty special to have my very own BTCC cars recreated as Scalextric models.

I have no doubt the 2015 BMR VW and my 2014 championship winning car will look cool, but most importantly I hope they are fast. I look forward to adding them to my collection,” commented Turkington.
