

A Very Special Cooper S from Mini

The Mini story rolls on and rolls on and now a new edition to the range, exclusively available in the UK; the John Cooper S 210 and thanks to a works pro tuning kit

power is boosted to 210bhp. Seventeen inch alloy wheels and a John Cooper Works aerodynamic kit is all part of the standard fit and the price? £25,150.

With the power raised from 192bhp, the new edition enters the range below the John Cooper Works models, while still offering a number of John Cooper Works features.

The throatier exhaust, taken from the Mini after sales product range and fitted by the retailer after registration is the one of the highlights of the new model.

As well as improving power output, the John Cooper Works pro tuning kit exhaust comes with a Bluetooth 4.0 controller which allows the driver to activate Track Mode when taking the car off road and onto the track.

Mini Cooper S Works 210 also offers exceptionally high levels of standard equipment and for those wishing to customise their car further, Cooper S Works 210

customers will be offered an extensive list of options, including the popular Chili

Pack, which represents a customer saving of 17 per cent against buying the individual equipment separately.

The Chili Pack includes LED headlights, LED front fog lights, cloth leather upholstery and multi-function steering wheel.

Still with Mini and one in ten of every car sold is a convertible and is a clear leader in its class in the UK.

Next year the Mini Challenge race series will be part of the British GT package and expect to see grids of 30 cars.
